ADULT GED PROGRAM

Adult GED Program

The GED Program...

...is self-directed and cloud-based using software from the GED Academy Online Learning Program and helps students (adults, dropouts, others) prepare for GED testing, college and career readiness.

...uses adaptive learning technology which combines adult basic education to GED level lessons across five subject areas into a personalized lesson plan that keeps students engaged and motivated.

...allows students work through the lessons (at home, on their smart phones and in the computer lab) while they advance through content designed for higher functional levels through grade 12. Students have personalized lesson plans with practice sessions.

...provides available tutoring for students face-to-face when they attend the weekly 2-hour computer lab class.

GED Graduates...

...on average, earn \$2,040 more a year than high school dropouts.

...who attend community colleges, on average, perform as well academically as high school graduates.

...are more likely than high school dropouts to receive additional training after earning their credential.

... are more likely to be employed full time than high school dropouts.

...(approximately 50%) attended two or four-year colleges after earning their GED credentials.

Passing the GED represents a level of literacy widely viewed as necessary for social and economic advancement.

Scholarship and Fee Guidelines:

- Availability of scholarships is contingent upon availability of funds.
- Generally, scholarships for GED tests will be paid on a reimbursement basis but exceptions are possible.
- Our goal is for students to complete their GED. While there are costs associated with offering the program we do not want the fees to be prohibitive. We will work with any student who desires to earn their GED, no matter their financial situation.

Other Guidelines: Students must make consistent progress towards a GED as determined by the study goals they set themselves at the beginning of the program and the time their license is active (normally no more than 6 months).
